| <b>Thermal Compound</b><br>The thermal grease is already pre-applied to the heatsink. If the cooler has to be installed a second time, we highly recommend the MX-2 of ARCTIC COOLING as thermal grease. Only this paste guarantees an optimum performance in combination with the surface of our heatsinks.                                                                                                                            | <b>Wärmeleitpaste</b><br>Die Wärmeleitpaste ist bereits auf dem Kühlkörper aufgetragen. Wird die Kühler ein zweites Mal installiert, dann empfehlen wir dringend die MX-2 von ARCTIC COOLING als Wärmeleitpaste. Nur hiermit kann optimale Leistung in Verbindung mit der Oberfläche unseres Kühlkörper garantiert werden.                                                                                                                                 | <b>Pâte thermique</b><br>La graisse thermique est préappliquée sur le radiateur. Si le refroidisseur doit être installé une deuxième fois, nous recommandons vivement la graisse thermique MX-2 d'ARCTIC COOLING. Seule cette pâte garantit une performance optimale avec l'état de surface de nos ventilateurs.                                                                                                                                                                                               | <b>Pasta Térmica</b><br>La pasta térmica está preaplicada al disipador. Si tiene que instalar el disipador una segunda vez, le recomendamos utilizar la pasta térmica MX-2 de ARCTIC COOLING. Sólo este compuesto garantiza un rendimiento óptimo en combinación con la superficie de nuestros disipadores.                                                                                                                                                                                      |
| <b>Limits of Warranty</b><br>Warranty coverage does not include the following:<br>- A faulty product that leads to harm or damage to other products<br>- Damage of product as a result of other product components<br>- Incorrect method of operation or use of product not for intended use<br>- Any form of alteration to original product<br>- Inability to install the product as a result of incompatibility with other components | <b>Garantieeinschränkungen</b><br>Die Garantie schließt Folgendes aus:<br>- Ein defektes Produkt, das zur Gefährdung oder Beschädigung anderer Produkte führt.<br>- Beschädigung eines Produkts aufgrund anderer Produktkomponenten.<br>- Unsachgemäßer Betrieb oder nicht-bestimmungsgemäßer Gebrauch.<br>- Jegliche Veränderung des Original-Produkts.<br>- Unmöglichkeit der Produktinstallation aufgrund von Inkompatibilität mit anderen Komponenten. | <b>La couverture de la garantie n'inclut pas les éléments suivants :</b><br>- Un produit défectueux qui conduit à faire chauffer ou à endommager d'autres produits<br>- Un dommage du produit résultant d'autres composants de produits<br>- Une méthode de fonctionnement incorrecte ou l'utilisation du produit pour un usage auquel il n'est pas destiné<br>- Toute forme d'altération du produit original<br>- L'impossibilité d'installer le produit suite à une incompatibilité avec d'autres composants | <b>Limitaciones de la garantía</b><br>La cobertura de la garantía no incluye los siguientes casos:<br>-Un producto defectuoso que provoque daños a otros productos.<br>-Daños del producto como resultado de componentes de otro producto.<br>-Un método de operación incorrecto ó un uso del producto distinto al pretendido.<br>-Cualquier forma de alteración al producto original.<br>-La imposibilidad de instalar el producto como resultado de la incompatibilidad con otros componentes. |
